## PROJECTS

### 2/2023 - 8/2023 Online Job Portal

- Developed a responsive online job portal using HTML, CSS, Bootstrap, and JavaScript, showcasing my proficiency in front-end web development and usability design.
- The platform serves as a user-friendly interface connecting job seekers with potential employers.
- Implemented responsive design techniques to ensure seamless user experiences on various devices, emphasizing my commitment to user accessibility.
- Technology Used: HTML5, CSS3, Bootstrap, Javascript, jQuery, Ajax, PHP, MySQL

### 12/2021 - 3/2022 Student Result Management System

- Web-based application that mainly focuses on providing the results to the students and the faculty. The student checks their respective result using their respective roll Number.
- Played a key role in the creation and enhancement of the front-end interface for a student result management system, utilizing HTML, CSS, and JavaScript. Implemented intuitive and visually appealing dashboards that improved user experience and accessibility for students, teachers, and administrators.
- Technology Used: HTML5, CSS3, Javascript, PHP, MySQL
